I am a customer of Rocky Mountain Power (the Company) who pays a premium to the Company for solar power generation. I am also a Utah resident. I am asking you to please withhold your approval of the Company's 2023 Integrated Resource Plan. I am also requesting you to require the Company to make changes that serve the best interests of its customers and Utah taxpayers.

I have asthma and I suffer the effects of pollution from sources of pollution such as the Company's resource choices. All citizens of Utah suffer poor health and reduction in our life expectancy and quality of life from such pollution. Climate change is impacted by the Company's greenhouse gas emissions drive climate change, which is already causing catastrophic costs to our community. The 2023 IRP relies too heavily on fossil fuels when clean renewable energy resources are available. A legitimate IRP would acknowledge the full range of climate change impacts linked to the Company's coal and methane combustion.

Please require the Company to take the following actions:

- Identify all other costs associated with RMP-PacifiCorp's combustion of fossil fuels for electricity generation and incorporate into the docket.
- Integrate all costs into all PSC dockets
- Reactivate the suspended RFP process for implementing solar, wind, and storage resources.

Thank you.  
Gene Jones

Dear Commissioners,

Climate change is here and what you do will have a huge impact. It's not too late to act!

Please withhold your approval of PacifiCorp's 2023 Integrated Resource Plan and require the corporation to make changes that serve the best interests of Rocky Mountain Power customers and Utah taxpayers.

RMP-PacifiCorp resource choices continue to needlessly drive climate change and impose an array of associated impact costs on my family and community. The 2023 IRP relies too heavily on fossil fuels when clean renewable energy resources are available. A legitimate IRP would acknowledge the full range of climate change impacts linked to RMP-PacifiCorp's coal and methane [natural gas] burners.

Please require the corporation to take the following IRP-related actions:

~ Integrate all costs and resource items of PSC dockets #23-035-27, #23-035-30, and #23-035-40 into the 2023 IRP docket, #23-035-10.

~ Identify, and incorporate into the IRP docket for resource vetting, all other costs associated with RMP-PacifiCorp's combustion of fossil fuels for electricity generation.

~ Reactivate the suspended RFP process for procuring solar, wind, and storage resources.

~ Prepare a supplemental IRP document that includes the newly incorporated information and actions requested here, and that reevaluates the corporation's preferred energy resource portfolio.

Thank you.

John Anderson

Dear Commissioners:

In multiple ways Rocky Mountain Power is acting contrary to the common good of the rate payers in Utah, all residents of Utah and the Western US, and indeed the global human population. They should not be rewarded by the PSC for their irresponsible behavior.

Every scientific organization has signed off on to the reality of the largely fossil fuel caused climate crisis being the greatest threat that the human race has ever faced. The world's medical community is unified in recognizing that the climate crisis is already becoming a massive, global threat that endangers the health, well being, safety, and food supply of millions of people. In the future that will become billions of people.

RMP needs to held accountable for business decisions that reflect a self-serving denial of that reality. In the short term what RMP is asking of the PSC is to allow them to unfairly charge Utah rate payers for the financial costs of their own mistakes. In the long term, their refusal to aggressively pursue non-carbon sources of electrical generation endangers all Utah residents.

A reality based Integrated Resource Plan would acknowledge the full range of climate change impacts linked to RMP-PacifiCorp's coal and methane [natural gas] burners. The PSC should deny PacifiCorp's 2023 IRP and require it to make the changes that serve the best interests of Rocky Mountain Power customers and Utah taxpayers. PSC should require of RMP that they:

- ~ Integrate all costs and resource items of PSC dockets #23-035-27, #23-035-30, and #23-035-40 into the 2023 IRP docket, #23-035-10.
- ~ Identify, and incorporate into the IRP docket for resource vetting, all other costs associated with RMP-PacifiCorp's combustion of fossil fuels for electricity generation.
- ~ Reactivate the suspended RFP process for procuring solar, wind, and storage resources.
- ~ Prepare a supplemental IRP document that includes the newly incorporated information and actions requested here, and that reevaluates the corporation's preferred energy resource portfolio.

Sincerely,

Dr. Brian Moench  
President, Utah Physicians for a Healthy Environment

Dear Commissioners,

Please withhold your approval of PacifiCorp's 2023 Integrated Resource Plan and require the corporation to make changes that serve the best interests of Rocky Mountain Power customers and Utah taxpayers.

RMP-PacifiCorp resource choices continue to *needlessly drive climate change* and impose an array of associated impact costs on my family and community. The 2023 IRP relies too heavily on fossil fuels when clean renewable energy resources are available. A legitimate IRP would acknowledge the full range of climate change impacts linked to RMP-PacifiCorp's coal and methane [natural gas] burners.

Please require the corporation to take the following IRP-related actions:

- Integrate all costs and resource items of PSC dockets #23-035-27, #23-035-30, and #23-035-40 into the 2023 IRP docket, #23-035-10.
- Identify, and incorporate into the IRP docket for resource vetting, all other costs associated with RMP-PacifiCorp's combustion of fossil fuels for electricity generation.
- Reactivate the suspended RFP process for procuring solar, wind, and storage resources.
- Prepare a supplemental IRP document that includes the newly incorporated information and actions requested here, and that reevaluates the corporation's preferred energy resource portfolio.

I am a customer and a constituent, and like you, also a victim of poor air quality. Utah is one of the fastest growing states, with Salt Lake City population expected to reach 4 million by 2033 (Kem Gardner Policy Institute). Meaning, our representatives HAVE TO stop our power company from increasing pollution. Rocky Mountain must(!) resume solar, wind and storage procurement. RMP must support homeowners and businesses to shoulder some of the electric burden with generous solar grants and loans.

Thank you.  
J. Patrick Logan

Dear Commissioners,

As a born and bred Utahn I fully support the message below this one, prepared by Ucare, of which I am an enthusiastic supporter.

As a taxpayer and utility customer, I think it's time that we truly make a concerted effort to power our beautiful state with renewable sources, like wind, water and solar. If PacifiCorp disagrees and continues to burn fossil fuels to power our cities, then PacifiCorp and Rocky Mountain Power should cover the added costs related to infrastructure damage; damage that is an obvious result of climate change, that is in turn a result of burning fossil fuels.

It is clear to me that those who profit most from the burning of fossil fuels are the company CEOs who sell it, not the customers who receive the energy. We, the consumers, are aware that solar, wind and water can just as easily, and more cleanly, power our homes. Those who profit from the continued dirty power, must shoulder the financial burden of its damage. That's what I think is right.

Peace,  
Jeremy Rishe  
Millcreek Township 84106

Ucare message below:
