To whom it may concern;

Please withhold your approval of PacifiCorp's 2023 Integrated Resource Plan and require the corporation to make changes that serve the best interests of Rocky Mountain Power customers and Utah taxpayers.

RMP-PacifiCorp resource choices continue to needlessly drive climate change and impose an array of associated impact costs on my family and community. The 2023 IRP relies too heavily on fossil fuels when clean renewable energy resources are available. A legitimate IRP would acknowledge the full range of climate change impacts linked to RMP-PacifiCorp's coal and methane [natural gas] burners.

Please require the corporation to take the following IRP-related actions:

- ~ Integrate all costs and resource items of PSC dockets #23-035-27, #23-035-30, and #23-035-40 into the 2023 IRP docket, #23-035-10.
- ~ Identify, and incorporate into the IRP docket for resource vetting, all other costs associated with RMP-PacifiCorp's combustion of fossil fuels for electricity generation.
- ~ Reactivate the suspended RFP process for procuring solar, wind, and storage resources.
- ~ Prepare a supplemental IRP document that includes the newly incorporated information and actions requested here, and that reevaluates the corporation's preferred energy resource portfolio.

Thank you for your time and attention;

Rick Walton

Dear Commissioners,

I am writing to you today out of great concern for the direction things are headed with Rocky Mountain power. We took a hard hit as a family when the rate for our solar energy was reduced greatly. As we try to do our part to clean the air you are making it difficult to succeed.

Please take a step in the right direction and withhold your approval of PacifiCorp's 2023 Integrated Resource Plan and require the corporation to make changes that serve the best interests of Rocky Mountain Power customers and Utah taxpayers.

RMP-PacifiCorp resource choices continue to needlessly drive climate change and impose an array of associated impact costs on my family and community. The 2023 IRP relies too heavily on fossil fuels when clean renewable energy resources are available. A legitimate IRP would acknowledge the full range of climate change impacts linked to RMP-PacifiCorp's coal and methane [natural gas] burners.

Please require the corporation to take the following IRP-related actions:

~ Integrate all costs and resource items of PSC dockets #23-035-27, #23-035-30, and #23-035-40 into the 2023 IRP docket, #23-035-10.

~ Identify, and incorporate into the IRP docket for resource vetting, all other costs associated with RMP-PacifiCorp's combustion of fossil fuels for electricity generation.

~ Reactivate the suspended RFP process for procuring solar, wind, and storage resources.

~ Prepare a supplemental IRP document that includes the newly incorporated information and actions requested here, and that reevaluates the corporation's preferred energy resource portfolio.

Thank you,
The Honorable Jackie Biskupski

Please do your job of representing all rate-paying Utahns being held hostage by Rocky Mountain Power and their irresponsible decisions based on profit and greed. It is YOUR JOB to hold them accountable for deliberately ignoring the science to maximize profits.

The plan does not account for Rocky Mountain Powers coal and methane burners climate-change impact. It needs more transparency in accounting costs associated with their combustion of fossil fuels for electricity generation. Why was the RFP process for procuring solar, wind, and storage resources suspended in the first place?!!!! This needs to be reactivated! Why does this all seem so shady?! Because it is!

Do your job of representing the best interests of rate payers that don't get the luxury of another choice.

-Tara Shupe

Dear Commissioners,

Please do not approve the Rocky Mountain Power -PacifiCorp 2023 Integrated Resource Plan and instead require the corporation to make changes that serve the best interests of Utahns.

Our community does not have to suffer from RMP-PacifiCorp resource choices that continue to needlessly drive climate change and impose an array of associated impact costs from pollution and health concerns to environmental degradation.

The 2023 IRP relies too heavily on fossil fuels when clean renewable energy resources are available and their costs continue to decrease which would benefit Utah taxpayers and all RMP customers. A legitimate IRP would acknowledge the full range of climate change impacts linked to RMP-PacifiCorp's coal and methane [natural gas] burners.

Please require the corporation to take the following IRP-related actions:

- ~ Integrate all costs and resource items of PSC dockets #23-035-27, #23-035-30, and #23-035-40 into the 2023 IRP docket, #23-035-10.
- ~ Identify, and incorporate into the IRP docket for resource vetting, all other costs associated with RMP-PacifiCorp's combustion of fossil fuels for electricity generation.
- ~ Reactivate the suspended RFP process for procuring solar, wind, and storage resources.
- ~ Prepare a supplemental IRP document that includes the newly incorporated information and actions requested here, and that reevaluates the corporation's preferred energy resource portfolio.

Thank you,

Annie Studer
