Dear Commissioners,

As a resident of Utah I request that you please withhold your approval of PacifiCorp's 2023 Integrated Resource Plan and require the corporation to make changes that serve the best interests of Rocky Mountain Power customers and Utah taxpayers.

RMP-PacifiCorp resource choices continue to needlessly drive climate change and impose an array of associated impact costs on my family and community. The 2023 IRP relies too heavily on fossil fuels when clean renewable energy resources are available. A legitimate IRP would acknowledge the full range of climate change impacts linked to RMP-PacifiCorp's coal and methane [natural gas] burners.

Please require the corporation to take the following IRP-related actions:

~ Integrate all costs and resource items of PSC dockets #23-035-27, #23-035-30, and #23-035-40 into the 2023 IRP docket, #23-035-10.

~ Identify, and incorporate into the IRP docket for resource vetting, all other costs associated with RMP-PacifiCorp's combustion of fossil fuels for electricity generation.

~ Reactivate the suspended RFP process for procuring solar, wind, and storage resources.

~ Prepare a supplemental IRP document that includes the newly incorporated information and actions requested here, and that reevaluates the corporation's preferred energy resource portfolio.

Thank you,
Aaron London
