Weather Analyst-Enterprise products

Release Order Against Contract: 4600005000

Invoices and contract questions please direct to Cara Glennon-Olsen Cara. Glennon-Olsen@pacificorp.com (503) 813-5874

Project Scope:

Implementation of the full suite of Technosylva#s Wildfire Analyst-Enterprise products across the 6-state service territory to support operational decision making through the fire season. Products include:

- FireCast. Performs millions of wildfire simulations daily using PacifiCorp#s 96-hour WRF forecast to identify distribution circuits and transmission lines that pose the greatest wildfire risk and downstream consequence based on current and forecast conditions. Output informs when and where system protection

Purchase Order

settings are changed and when and where a PSPS may be necessary. - FireSim. Allows for real-time simulation of reported or ongoing wildfires to identify assets at risk, time of arrival, etc. to help mitigate potential damage through actions like pole wrapping. - Mobile App for iOS or Android. Can be used by PacifiCorp#s Emergency Management department to run real-time simulations of active ignition or fires, generate a report of wildfire simulation results (maps, assets at risk, wildfire behavior, etc.)that can be delivered to leadership via a push notification to a complimentary Leadership App for iOS or Android. The entire process takes a few minutes or less. - Wildfire Risk Reduction Model (WRRM). Used to calculate the long-term Risk Spend Efficiency (RSE) associated with system hardening projects and other wildfire mitigation efforts. It is also used to identify the areas of highest risk based on climatology, asset information, vegetation, and wildfire consequence. Delivery will take place through 2022-23. - PacifiCorp WRF visualization within Wildfire Analyst-Enterprise will allow for more thorough analysis of weather and fire information in a single tool. - Under the direction of PacifiCorp#s subject matter experts, Technolsylva will use their tools and technology to develop a Fire Potential Index like what the CA Investor Owned Utilities (IOUs) are using but customized to our complex and diverse service territory.
