

Rocky Mountain Power  
Docket No. 24-035-01  
Witness: Robert M. Meredith

BEFORE THE PUBLIC SERVICE COMMISSION  
OF THE STATE OF UTAH

ROCKY MOUNTAIN POWER

---

Direct Testimony of Robert M. Meredith

May 2024

1 **Q. Please state your name, business address, and present position with PacifiCorp**  
2 **d/b/a Rocky Mountain Power (“Rocky Mountain Power” or the “Company”).**

3 A. My name is Robert M. Meredith. My business address is 825 NE Multnomah Street,  
4 Suite 2000, Portland, Oregon 97232. My present position is Director, Pricing and Tariff  
5 Policy.

6 **I. QUALIFICATIONS**

7 **Q. Briefly describe your educational and professional background.**

8 A. I have a Bachelor of Science degree in Business Administration and a minor in  
9 Economics from Oregon State University. In addition to my formal education, I have  
10 attended various industry-related seminars. I have worked for the Company for 19 years  
11 in various roles of increasing responsibility in the Customer Service, Regulation, and  
12 Integrated Resource Planning departments. I have over 13 years of experience  
13 preparing cost of service and pricing related analyses for all of the six states that  
14 PacifiCorp serves. In March 2016, I became Manager, Pricing and Cost of Service. In  
15 February 2022, I assumed my present position.

16 **Q. Have you testified in previous regulatory proceedings?**

17 A. Yes. I have previously filed testimony on behalf of the Company in regulatory  
18 proceedings in Utah, Wyoming, Idaho, Oregon, Washington and California.

19 **II. PURPOSE AND SUMMARY OF TESTIMONY**

20 **Q. What is the purpose of your testimony?**

21 A. The purpose of my testimony is to present and support the Company’s proposed rate  
22 spread and rates in Schedule 94 to recover the requested Energy Balancing Account  
23 (“EBA”) deferral amount identified by Company witness Jack Painter for the

24 12-months ended December 31, 2023 (“2024 EBA”). To mitigate rate impacts, the  
25 Company proposes amortizing the 2024 EBA over 24 months.

26 **Q. Please summarize the rate impacts for the proposed change to Schedule 94 for this**  
27 **filing.**

28 A. The change in Schedule 94 is an increase of \$52.4 million, or 2.4 percent. This net  
29 change is the difference between the current collection level of \$175.0 million and the  
30 new proposed collection level of \$227.5 million for the 2024 EBA. Exhibit  
31 RMP\_\_\_(RMM-1), page 1, shows the net impact by rate schedule.

32 **III. PROPOSED EBA RATE SPREAD**

33 **Q. What is the 2024 EBA deferral amount in this case?**

34 A. The total 2024 EBA deferral is \$455.0 million, as shown in Table 1 of Mr. Painter’s  
35 testimony. The Company proposes to recover this amount on an interim basis for the  
36 24-month period from July 1, 2024 through June 30, 2026. On an annual basis, the  
37 proposed recovery of the 2024 EBA deferral is \$227.5 million.

38 **Q. How does the Company propose to allocate the 2024 EBA deferral balance across**  
39 **customer classes?**

40 A. Consistent with the Company’s last EBA filing, the Company proposes to spread the  
41 2024 EBA deferral across customer rate schedules consistent with the base EBA  
42 amounts approved by the Commission in the 2020 general rate case, Docket No.  
43 20-035-04 (“2020 GRC”). The allocators and allocations by rate schedule are shown  
44 on page 2 in Exhibit RMP\_\_\_(RMM-1). To develop EBA allocators by class, the  
45 Company allocated each FERC account used within the base EBA on either the cost of

46 service factor 10 or factor 30 used in the 2020 GRC, as appropriate. The FERC account  
47 level class allocation of the base EBA is shown on page 3 in Exhibit RMP\_\_\_(RMM-1).

48 **Q. How does the Company propose to allocate the 2024 EBA revenue to those**  
49 **customer classes that were not reflected in the EBA Allocators?**

50 A. There are two customer classes—Schedule 31 and Schedule 32—that are subject to the  
51 EBA but were not included in the Company’s cost of service studies in the 2020 GRC  
52 and therefore not reflected in the EBA Allocators. For these customer classes, the  
53 Company proposes to apply the same percentage change to these customer classes as  
54 Schedule 9.

55 **Q. How does the Company propose to allocate the 2024 EBA revenue to Contract**  
56 **Customer 1 and Contract Customer 2?**

57 A. Consistent with the terms of the contracts approved by the Public Service Commission  
58 of Utah in Docket No. 21-035-69 and Docket No. 21-035-53, the 2023 EBA revenue  
59 allocation for Contract Customer 1 and Contract Customer 2 is based on the overall  
60 2024 EBA percentage to tariff customers in Utah.

61 **Q. How does the Company propose to collect the 2024 EBA deferral after these**  
62 **adjustments to the EBA Allocators?**

63 A. The results of the 2024 EBA deferral spread based on the EBA Allocator are then  
64 proportionally adjusted for all customer classes to collect a total target annual amount  
65 of \$227.5 million.

66 **Q. What present revenues and billing determinants is the Company proposing to use**  
67 **to allocate the 2024 EBA?**

68 A. The Company proposes using the Commission approved present revenues and billing

69 determinants set forth in its 2020 general rate case, Docket No. 20-035-04 (“2020  
70 GRC”).

71 **IV. PROPOSED RATES FOR SCHEDULE 94**

72 **Q. How were the proposed Schedule 94 rates developed for each customer class?**

73 A. Consistent with the EBA Rate Determination provision in Schedule 94, the proposed  
74 rates for each customer class were determined by dividing the allocated EBA deferral  
75 amount to each rate schedule and applicable contract by the corresponding 2020 GRC  
76 forecast Power Charge and Energy Charge revenues. Charges for energy enrolled in the  
77 Subscriber Solar program were excluded from this calculation, since loads enrolled in  
78 the program no longer pay for the EBA. The EBA rate is a percentage applied to the  
79 monthly Power Charges and Energy Charges.

80 **Q. Please describe Exhibit RMP\_\_\_(RMM-2).**

81 A. Exhibit RMP\_\_\_(RMM-2) contains the billing determinants and the calculations of the  
82 proposed EBA rates in this case.

83 **Q. Please describe Exhibit RMP\_\_\_(RMM-3).**

84 A. Exhibit RMP\_\_\_(RMM-3) contains the proposed tariff rate revisions for Schedule 94.  
85 Along with the requested update to the prices, the Company is requesting updates to  
86 the descriptions of the accounts included in the EBA. These changes are addressed in  
87 Mr. Painter’s testimony.

88 **Q. Did you include workpapers with this filing?**

89 A. Yes. Workpapers have been included with this filing that detail the calculations shown  
90 in my exhibits.

91 Q. Does this conclude your direct testimony?

92 A. Yes.

Accruals or estimates in accounts 409.1, 447, 555, and 565 will be excluded; rather, expenses and revenue will be accounted for in the months that they are incurred. Adjustments shall be made to Actual EBAC that are consistent with Commission accepted or ordered adjustments, or adjustments called out in a stipulation or settlement agreement, as ordered in the most recent general rate case, major plant addition case, or other case where Base EBAC are approved.

**EBA DEFERRAL:** The monthly EBA Accrual (positive or negative) is determined by calculating the difference between Base NPC and Actual NPC as is described below.

$$EBA\ Deferral_{Utah, month} = [(Actual\ EBAC_{month/MWh} - Base\ EBAC_{month/MWh}) \times Actual\ MWh_{Utah, month}]$$

Where:

$$Actual\ EBAC_{month/MWh} = (NPC_{Utah, month, actual} / Actual\ MWh_{Utah, month}) + (PTC_{Utah, month, actual} / Actual\ MWh_{Utah, month}) + (WR_{Utah, month, actual} / Actual\ MWh_{Utah, month})$$

$$Base\ EBAC_{month/MWh} = (NPC_{Utah, month, base} / Base\ MWh_{Utah, month}) + (PTC_{Utah, month, base} / Base\ MWh_{Utah, month}) + (WR_{Utah, month, base} / Base\ MWh_{Utah, month})$$

$NPC_{Utah, month}$  = Total Company NPC for the month multiplied by the appropriate allocation factors from the most recent general rate case, major plant additions case, or other case where Base EBAC are approved.

$PTC_{Utah, month}$  = Total Company PTC for the month multiplied by the appropriate allocation factors from the most recent general rate case, major plant additions case, or other case where Base EBAC are approved.

FERC Sub 4091100, 4091150 – STATE INC TAX-ELEC, INC TX\_EL UON-S-OC (Exclude)

Accruals or estimates in accounts 409.1, 447, 555, and 565 will be excluded; rather, expenses and revenue will be accounted for in the months that they are incurred. Adjustments shall be made to Actual EBAC that are consistent with Commission accepted or ordered adjustments, or adjustments called out in a stipulation or settlement agreement, as ordered in the most recent general rate case, major plant addition case, or other case where Base EBAC are approved.

**EBA DEFERRAL:** The monthly EBA Accrual (positive or negative) is determined by calculating the difference between Base NPC and Actual NPC as is described below.

$$EBA\ Deferral_{Utah, month} = [(Actual\ EBAC_{month/MWh} - Base\ EBAC_{month/MWh}) \times Actual\ MWh_{Utah, month}]$$

Where:

$$Actual\ EBAC_{month/MWh} = (NPC_{Utah, month, actual} / Actual\ MWh_{Utah, month}) + (PTC_{Utah, month, actual} / Actual\ MWh_{Utah, month}) + (WR_{Utah, month, actual} / Actual\ MWh_{Utah, month})$$

$$Base\ EBAC_{month/MWh} = (NPC_{Utah, month, base} / Base\ MWh_{Utah, month}) + (PTC_{Utah, month, base} / Base\ MWh_{Utah, month}) + (WR_{Utah, month, base} / Base\ MWh_{Utah, month})$$

$NPC_{Utah, month}$  = Total Company NPC for the month multiplied by the appropriate allocation factors from the most recent general rate case, major plant additions case, or other case where Base EBAC are approved.

$PTC_{Utah, month}$  = Total Company PTC for the month multiplied by the appropriate allocation factors from the most recent general rate case, major plant additions case, or other case where Base EBAC are approved.

$WR_{Utah, month}$  = Total Company Wheeling Revenue for the month multiplied by the appropriate allocation factors from the most recent general rate case, major plant additions case, or other case where Base EBAC are approved.
