I'm emailing regarding Docket No. 24-035-04

Please stop and reject any increase in utility rates for increased executive salary, profit, dividends, etc. I can understand a small rate increase for infrastructure, management, and average RMP worker pay, but rate increases are a burden on Utah citizens, especially now with housing and goods prices being very high, and general wages not increasing to match. Utilities companies should not be asking everyday citizens to pay more for their utilities to profit executives or shareholders. Please keep rates as affordable as possible.

Thank you,

Rachel Engler  
Utah resident and RMP customer (as I don't have a choice in my electricity provider)
