Dear Utah Public Service Commission,

Thank you for supporting ratepayer interests in reducing Rocky Mountain Powerandapos;s rate-increase request in Docket No. 24-035-04.

You listened to Utahnsandapos;s concerns and accepted public input via hearings and the written docket. Thank you for holding shareholders accountable for Rocky Mountain Powerandapos;s major contribution to increased wildfire risk in the U.S. because of coal-burning power plantsandapos;s well-documented impact on a heating climate.

As you consider the additional coal and gas fuel costs Rocky Mountain Power is seeking to recover through Docket No. 25-035-01, please keep in mind that Utah is home to abundant low-cost clean-energy resources, including solar and geothermal, that have no fuel costs. Those renewable resources reduce our reliance on costly coal and gas plants and expensive market purchases. In addition, a recent Reuters analysis estimated that the coal plants operated by Berkshire Hathaway, including the Rocky Mountain Power fleet, cause up to 260 deaths and \$3.9 billion in medical costs every year. Please reduce Rocky Mountain Powerandapos;s requested cost reimbursements in recognition of its poor decision-making.

As you begin the utilityandapos;s Integrated Resource Plan process, I urge you to ensure that its planning prioritizes reliable, clean, low-cost resources, especially solar, wind, geothermal, and energy storage.

Sincerely,

John Cuomo

Reply-To: Naresh Kumar <nareshorama@gmail.com>

To: psc@utah.gov

Dear Utah Public Service Commission,

I was born, raised, and have lived in Utah almost my entire life. I love the land, water, and air that has sustained me, my family, and my friends for decades. Please do all you can to preserve, protect, and defend our home from misguided profit-seeking that comes at the expense of our health, safety, and security. Thank you!

As a RMP ratepayer, I want to thank you for supporting our interests by reducing Rocky Mountain Powerandapos;s rate-increase request in Docket No. 24-035-04.

Because you listened to Utahnsandapos; concerns and accepted public input via hearings and the written docket, Utahns are more energy and economically secure. You give us hope when you hold shareholders accountable for Rocky Mountain Powerandapos;s major contribution to increased wildfire risk.

Please remember us when considering the additional coal and gas fuel costs Rocky Mountain Power is seeking to recover through Docket No. 25-035-01. Keep in mind that Utah has abundant low-cost clean-energy resources, including solar and geothermal, that have no fuel costs. These renewable resources reduce our reliance on costly coal and gas plants and expensive market purchases.

Reuters recently found that Berkshire Hathaway coal plants, including the Rocky Mountain Power fleet, cause up to 260 deaths and \$3.9 billion in medical costs every year. Please reduce Rocky Mountain Powerandapos;s requested cost reimbursements in recognition of its poor decision-making.

As you begin the utilityandapos;s Integrated Resource Plan process, I urge you to ensure that its planning prioritizes reliable, clean, low-cost resources, especially solar, wind, geothermal, and energy storage.

Sincerely,

Naresh Kumar
