## Rocky Mountain Power

I just filed a complaint with the department of public utilities. I saw their message about a Rocky Mountain power rate increase and I have to send this too. There is absolutely no way that company can take more money from your citizens. They continuously disrupt people's lives with countless outages and never notify anyone. They do not operate transparently, have zero regard for people's livelihoods. Everyone in my area works from home and children do school from home. How can we do that if they only cut power all day during work and school hours? They are useless when it comes to customer support, offer no assistance. I would rather see the entire company burn to the ground than give them more money. They can't even guarantee a 90% uptime on their service with my area right now. If I could switch to a different power company I would have already but you've allowed them to have a monopoly. They already charge so much money that I have to make 2 payments every month in the winter. Their payment system does not even accept the amount that they charge me all at once. Do. Not. Allow. Them. To. Increase. Rates.

## Extreme Rise in Utilities

Hello,

Please consider intervening on behalf of Utah residents for the extreme increase in electricity charges! I have a small house near Liberty park and my electric bill jumped to over \$300 in the last few months. Please pressure the utility providers to decrease electricity rates. If the provider cannot decrease rates, consider what you can do as the PSC to decrease our bills. Long time Utah residents do not have the resources to pay for these extreme rate hikes in addition to the tax increases that are being pushed through. As an appointed public servant, please take action to reduce these extreme rate hikes.

Best, Andrea
