I would like to request that Rocky Mountain Power not be allowed to raise our rates yet again!

Power rates were just increased recently and are already very high.

I oppose a rate increase by Rocky Mountain Power. They should make it more efficient to recover costs to install rooftop solar.

The rates that Rocky Mountain is charging is absolutely unacceptable. There is no way that I can afford another increase. It has doubled since last year and it sounds like it's going to get even more expensive than I am absolutely opposed of this new increase.

Rate increases due to data center

To: psc@utah.gov

As a concerned home owner how much cost can you place on the home owners? Data centers are worth Billions and should 100% own the increases. All centers should also be liable for all waste clean up to ensure our beautiful state isn't ruined like other states have seen. There's no justification when adding additional cost and waste to claim this is a beneficial gain for any resident of this state.

Sincerely
Cynthia Johnsen

Dear Commissioners / DPU Representatives,

I am writing to formally oppose the proposed second rate increase by Rocky Mountain Power. The existing electricity costs are already excessively burdensome for me and my family. An additional increase would place further undue financial hardship on us.

Issues / Concerns:

1. Affordability: The current rates are already difficult to manage. Further increases will disproportionately impact households with limited income.
2. Lack of transparency / explanation: Requests for justification (costs for fuel, infrastructure, maintenance, etc.) need to be clearly documented. Any rate hike should be based on verifiable need, not simply increased profits.
3. Economic impact: Higher utility bills reduce ability to afford other essentials (e.g. food, transportation, healthcare). This increase could force difficult trade-offs or hardship.
4. Public interest: The PSC / DPU have a responsibility to ensure utility rates are fair, just, and reasonable. Rate increases must consider the impact on customers, particularly vulnerable ones.

Requested actions:

- Deny or significantly reduce the proposed rate increase.
- Require Rocky Mountain Power to provide a full, detailed accounting of the costs that justify any increase, including evidence of efficiency or savings elsewhere.
- Explore alternatives to rate increases—such as cost savings, subsidies, or low-income assistance programs—for customers who cannot afford higher rates.

Background / Supporting Information:

- Rocky Mountain Power has already filed for rate hikes in recent dockets.
Source: <https://kutv.com/news/eye-on-your-money/rocky-mountain-power-files-appeal-for-larger-rate-hike-than-legislature-approved>
- https://psc.utah.gov/category/tariff/?utm_
- <https://www.rockymountainpower.net/about/rates-regulation/utah-regulatory-filings.html>
- The Utah Division of Public Utilities processes complaints and must respond to informal complaints within 5 business days. Source:

- The PSC invites comments about current rate increase requests.

I respectfully request that you consider the serious financial impact this proposed rate increase would have on me and other Utah residents, especially those who are already stretched thin.

Thank you for your attention to this matter.

Sincerely,

Tristan Chadwick

Please be advised, we are all hard pressed to pay our bills that have all escalated. Please don't allow another rate increase from Rocky Mountain Power. Thank you
