Utah is unbelievably too high in every aspect! Homes, food, bills like water, electrical and heating. Medical is killing us and everyone I know. How do we survive? Please don't give us another rate hike!

Rocky Mountain has already had one rate increase. another rate increase at this time, when food prices are high, tariffs are affecting the prices of everything from school clothes to paper to toothbrushes. rocky mountain power continues to make a profit. so i respectfully implore you to please deny their proposed increased.

thank you,

Julia Anderson, kearns resident

To whom it may concern:

As a senior citizen another rate hike by Rocky Mountain Power would put a *bigger* strain on my budget than it already has. My bill in July was \$105.71 and \$128.64 for August and \$90.90 for September.

I have lived in the same house for 20 years and my bill has NEVER been this high. In order to pay these bills I cut my food budget.

Rocky Mountain Power should learn to live within their budget like everyone else.
