Utah is amazing for leading this program. These renewables are paving a way for life to flourish in Utah in the future. Utah has not been great at preserving its land but this is an amazing opportunity to change the terrifying direction Utah is headed in environmentally-speaking.

Please approve the application!!!  
Sincerely,  
Betty Samples

Dear Utah Public Service Commission,

I am writing in support of Rocky Mountain Power's application, filed in Docket No. 25-035-06, Application of Rocky Mountain Power to Implement Community Clean Energy Program Authorized by the Community Clean Energy Act. As a community member in Utah, I see Renewable Communities as a meaningful step toward a healthier, more resilient future for our state. The Community Clean Energy Program will deliver affordable, reliable, and clean power while supporting the well-being of our families and the strength of our local economy.

Rocky Mountain Power's current energy mix is projected to remain approximately 50% fossil fuels by 2030. This application offers communities the opportunity to diversify their energy sources with new clean resources ? strengthening local resilience and reducing dependence on external markets. It will provide communities more control over where their energy comes from ? promoting energy freedom and innovation here in Utah.

The program also supports Utah's economic development goals, aligning with Gov. Cox's Operation Gigawatt and encouraging investment in local energy projects. This program is widely supported because it's good for public health, good for our economy, and good for the future of Utah. I urge you to approve the application.

Thank you for your leadership and commitment to advancing clean energy for Utahns.

Sincerely,

Pamela Oerth
