Dear Utah Public Service Commission,

I am writing in support of the Rocky Mountain Power application, filed in Docket No. 25-035-06, to Implement Community Clean Energy Program Authorized by the Community Clean Energy Act.

As a community member in Utah, I see Renewable Communities as a meaningful step toward a healthier, more resilient future for our state. The Community Clean Energy Program will deliver affordable, reliable, and clean power while supporting the well-being of our families and the strength of our local economy.

This application offers communities the opportunity to diversify their energy sources with new clean resources -- increasing job opportunities, lowering electric rates, supporting healthier air and reducing dependence on external markets. It will provide communities more control over where their energy comes from -- promoting energy freedom and innovation here in Utah.

The program also supports Utah's economic development goals, aligning with Gov. Cox's Operation Gigawatt and encouraging investment in local energy projects. This program is widely supported because it's good for public health, good for our economy, and good for the future of Utah. I urge you to approve the application.

Thank you for your leadership and commitment to advancing clean energy for Utahns.

Sincerely,

Aaron London
