Dear Utah Public Service Commission Members,

My name is Katherine Johnson, I am a resident of Salt Lake County, an artist, a wife, and most importantly mother of a fantastic 3-year-old girl. I am writing to you to please **support Docket No: 25-035-06**. This will help Utah meet its goal of energy independence, clean the air in the valley, and hopefully lower our skyrocketing energy bills.

Those are the main reasons I care about Docket No: 25-035-06 - clean air, low energy costs and energy independence.

As a mother, I want to give my daughter the best environment possible for her to grow up. Utah, and especially the Salt Lake Valley, has a history of awful air pollution. Phasing out coal and natural gas from the electric grid would do wonders in improving air quality. I lived almost all my life in Utah, first in Provo, then in and around Ogen/Layton and for the past six years in Salt Lake. I now have exercise-induced asthma and my voice has suffered the air quality effects as well - I am part of the Utah Symphony choir, though singing feels harder every year. I want to keep my daughter from having the same fate, but still want to keep Utah our home.

Another reason is simply affordability. I have seen the rapid increase of energy costs in the last few years and I worry about how this trend could affect my family for years to come. Solar and wind energy have already proven much more economical alternatives to coal, and in recent years have shown to also be cheaper than natural gas. I believe adding them to the mix would stabilize - and in the long term, help reduce - energy costs.

Lastly, the monopoly that is Rocky Mountain Power has little incentive to move away from coal and gas. But the communities that form part of the Community Clean Energy Program have shown they want independence from fossil fuels. Approving Docket No: 25-035-06 would allow them the chance to diversify the electric energy mix.

To me, this is an obvious win-win-win situation. So I highly encourage you to support Docket No: 25-035-06. Thank you in advance for your consideration.

Warm regards,  
Katherine Johnson

Dear Utah Public Service Commission,

I am writing in support of the Rocky Mountain Power application, filed in Docket No. 25-035-06, to Implement Community Clean Energy Program Authorized by the Community Clean Energy Act.

As a community member in Utah, I see Renewable Communities as a meaningful step toward a healthier, more resilient future for our state. The Community Clean Energy Program will deliver affordable, reliable, and clean power while supporting the well-being of our families and the strength of our local economy.

This application offers communities the opportunity to diversify their energy sources with new clean resources -- increasing job opportunities, lowering electric rates, supporting healthier air and reducing dependence on external markets. It will provide communities more control over where their energy comes from -- promoting energy freedom and innovation here in Utah.

The program also supports Utah's economic development goals, aligning with Gov. Cox's Operation Gigawatt and encouraging investment in local energy projects. This program is widely supported because it's good for public health, good for our economy, and good for the future of Utah. I urge you to approve the application.

Thank you for your leadership and commitment to advancing clean energy for Utahns.

Sincerely,

Quintin Lodge

Dear Utah Public Service Commission,

Myself, my husband and my son have all had bronchitis in the past year, exacerbated by the poor air quality here in Salt Lake City. We now all use inhalers on a regular basis. Something we didn't have to do, before moving here from Idaho in 2017. Utah needs to support legislation to protect Utahns with breathing difficulties, many of whom are our precious kids.

I am writing in support of the Rocky Mountain Power application, filed in Docket No. 25-035-06, to Implement Community Clean Energy Program Authorized by the Community Clean Energy Act.

Dear Utah Public Service Commission,

To PSC: it is really important that UT continues its progress forward. While I support the "all of the above" approach, we need to take advantage of UT solar and other renewable resources. Please vote to approve the UT renewable communities application.

As a water manager, I can assure you that having local decisions is key, and climate change is REAL. We must push forward to develop a broad, diverse portfolio of energy sources.

I am writing in support of the Rocky Mountain Power application, filed in Docket No. 25-035-06, to Implement Community Clean Energy Program Authorized by the Community Clean Energy Act.

Dear Utah Public Service Commission,

Utah needs to be at the forefront of renewable energy, for our children and grandchildren as well as for all of us who live and love life here.

I am writing in support of the Rocky Mountain Power application, filed in Docket No. 25-035-06, to Implement Community Clean Energy Program Authorized by the Community Clean Energy Act.

As a community member in Utah, I see Renewable Communities as a meaningful step toward a healthier, more resilient future for our state. The Community Clean Energy Program will deliver affordable, reliable, and clean power while supporting the well-being of our families and the strength of our local economy.

This application offers communities the opportunity to diversify their energy sources with new clean resources -- increasing job opportunities, lowering electric rates, supporting healthier air and reducing dependence on external markets. It will provide communities more control over where their energy comes from -- promoting energy freedom and innovation here in Utah.

The program also supports Utah's economic development goals, aligning with Gov. Cox's Operation Gigawatt and encouraging investment in local energy projects. This program is widely supported because it's good for public health, good for our economy, and good for the future of Utah. I urge you to approve the application.

Thank you for your leadership and commitment to advancing clean energy for Utahns.

Sincerely,

Holly Stuart

Dear Utah Public Service Commission,

Dear Representative, Please help YOUR children and OURS enjoy a life of clean air and water like we enjoyed. I think we all want a better life for our kids and their kids and this "Community Clean Energy Program" will help achieve this goal.

I am writing in support of the Rocky Mountain Power application, filed in Docket No. 25-035-06, to Implement Community Clean Energy Program Authorized by the Community Clean Energy Act.

As a community member in Utah, I see Renewable Communities as a meaningful step toward a healthier, more resilient future for our state. Dear Utah Public Service Commission,

I have been supporting wind energy for 15 years, and had solar and my home for 11 years. I care about our city, county, state, nation, and the planet. Despite the Federal sabotaging of everything the IRA worked for over the last 5 years., we should have control over our home environment.

I am writing in support of the Rocky Mountain Power application, filed in Docket No. 25-035-06, to Implement Community Clean Energy Program Authorized by the Community Clean Energy Act.
