I strongly support CREP . All cities need the option of powering with solar., especially as our air quality is so often poor and the use of fossil fuel makes it worse. Plus, fossil fuels are the cause of over 70% of greenhouse gases. I feel we have a moral obligation to provide a solar option.

My husband and I installed solar on our home about 9 years ago and have uninterrupted power and minimal electricity bills. This needs to be an option for all Utahns.
