Dear Utah Public Service Commission,

Lets go forward not backwards!

I am writing to express my concerns about Rocky Mountain Power's 2025 Integrated Resource Plan. This plan prioritizes costly, harmful technologies while reversing plans to invest in clean, affordable energy, leaving Utah ratepayers to bear the financial and health burdens.

RMP's continued reliance on outdated coal plants and expensive carbon-capture technology is a risk-laden plan that threatens to drive up energy costs.

More than 80% of RMP's requested rate increases in the last two years were due to high coal and gas costs. Meanwhile, Utah stands to gain millions in tax revenue and thousands of jobs by expanding renewable energy, according to a Sierra Club analysis conducted by Current Energy.. Yet PacifiCorp's plan moves in the opposite direction.

I urge the PSC to reject costly, high-risk continued reliance on fossil fuels and instead push Rocky Mountain Power and PacifiCorp to prioritize affordable, reliable clean energy that benefits Utah families and businesses. When RMP's pursuit of carbon capture and small-scale nuclear fail to materialize, it will be RMP's customers who pay the price. RMP should be investing in clean energy today, when it is cheapest, not waiting until the 2030s to commit. Utahns shouldn't have to pay more for decisions that benefit corporate shareholders and hurt our communities.

Please advocate for an energy plan that protects ratepayers, public health, and our economic future by rejecting PacifiCorp's current Integrated Resource Plan.

Sincerely,

Amelia Jones

Dear Utah Public Service Commission,

Feed Solar through the grid. For EVERY BUILDING to harbor it's own individual SOLAR/POWERPLANT with storage batteries is not sustainable! Not safe and not cost effective!

I am writing to express my concerns about Rocky Mountain Power's 2025 Integrated Resource Plan. This plan prioritizes costly, harmful technologies while reversing plans to invest in clean, affordable energy, leaving Utah ratepayers to bear the financial and health burdens.

Dear Utah Public Service Commission,

You guys. Come on. People and the environment are not things to be milked and squeeze. We need renewable energy. Use your brains and think ahead. Or just look outside on a day of bad inversion. Or look at the increased rates of birth defects, depression, etc we have in Utah. The pollution in the air is a direct and major contributor to these problems. Help ALL our futures, including yours, and reconsider your abysmal energy plan.

I am writing to express my concerns about Rocky Mountain Power's 2025 Integrated Resource Plan. This plan prioritizes costly, harmful technologies while reversing plans to invest in clean, affordable energy, leaving Utah ratepayers to bear the financial and health burdens.
