Subject: Docket No: 25-035-52 Utah Energy's Request for Expedited Investigatory Docket and Agency Action

Dear Commissioners,

We appreciate the opportunity to submit comments in response to the September 10, 2025, Notice of Filing and Comment Period in support of an expedited or other resource addition strategy, given the exigent circumstances caused by changes to federal policy and guidance.

rPlus Energies, LLC (rPlus Energies) is headquartered in Salt Lake City, Utah and has been developing utility-scale, cost-competitive energy projects in this market since its inception in 2018. Its leadership team has significant industry experience and a broad range of expertise in energy project development, financing, procurement, construction and operations since the 2010s. Proudly, four rPlus Energies-developed projects are now either delivering energy to PacifiCorp or under construction.

We have been working diligently on several Utah-sited projects that have achieved major development milestones, including site control, interconnection, and local permitting. These projects could achieve commercial operation in the near-term, thereby providing cost-effective power to meet the growing demand.

Should the Commission and PacifiCorp move quickly on a procurement or other resource addition strategy, rPlus Energies would be prepared to match that speed and deliver tax advantaged energy generation and/or energy generation paired with capacity projects into the market. Thank you for your consideration.

Sincerely,

Theresa Foxley
Chief of Staff
rPlus Energies, LLC

DOCKET NO. 25-035-52

CERTIFICATE OF SERVICE

I certify that on September 19, 2025 a true and correct copy of the filing was served upon the following via electronic mail:
