DPU Data Request 4.17

DPU Data Request 4.17

ELI - Please provide ratios of Total Overall Coverage Limit/Total Annual Premiums (Cost of Insurance) for each year: 2016 through 2025. Please provide this metric on a total BHE Company-wide basis as well as for PacifiCorp.

Response to DPU Data Request 4.17

The Company defines ratios of Total Overall Coverage Limit/Total Annual Premiums (Cost of Insurance) as the Rate on Line. Rate on Line (ROL) is expressed as a percentage and indicates how much premium the Company pays for each dollar of coverage purchased. Rate on Line equals premium divided by the total limit.

Please refer to Confidential Attachment DPU 4.17 which outlines the BHE company-wide ROL for excess liability spend 2016 through 2025. Please note that calculating an exact ROL can be challenging due to the varying wildfire sublimits applied to each state, as well as differences in market pricing under these policies. The ROL does not differ when viewed for PacifiCorp alone.

Confidential information is provided subject to Public Service Commission of Utah (UPSC) Rules R746-1-601–606.
