OF THE STATE OF UTAH

ROCKY MOUNTAIN POWER

---

Direct Testimony of Kenneth Lee Elder, Jr.

March 2026

1 **Q. Please state your name, business address, and present position with PacifiCorp**  
2 **d/b/a Rocky Mountain Power (PacifiCorp or Company).**

3 A. My name is Kenneth Lee Elder, Jr. My business address is 825 NE Multnomah Street,  
4 Suite 2000, Portland, Oregon 97232. My present position is Director, Pricing and Tariff  
5 Policy.

## 6 **I. QUALIFICATIONS**

7 **Q. Please describe your education and professional background.**

8 A. I have a Bachelor's degree in Agriculture Business from Tarleton State University and  
9 a Master's degree in Agricultural and Resource Economics from Colorado State  
10 University. I have been employed by PacifiCorp since July 2016, where I have  
11 managed load forecasting and load research. From 2008 through 2016, I was an  
12 economist for a natural resource consulting firm. From 2004 through 2008, I was an  
13 economist for the University of Alaska Fairbanks. In May 2025, I assumed my current  
14 position.

15 **Q. What are your responsibilities?**

16 A. I am responsible for regulated retail rates and cost of service analysis in the Company's  
17 six state service territory.

18 **Q. Have you testified in previous regulatory proceedings?**

19 A. Yes. I have previously filed testimony on behalf of the Company in regulatory  
20 proceedings in Utah, Oregon, Wyoming and Washington.

## 21 **II. PURPOSE AND SUMMARY OF TESTIMONY**

22 **Q. What is the purpose of your testimony?**

23 A. The purpose of my testimony is to present the Company's proposed rate spread and

24 rates in Schedule 98 to recover the deferred renewable energy credit (“REC”) revenues  
25 in the REC Balancing Account (“RBA”).

26 **Q. Please summarize the rate impacts for the proposed change in rates to Schedule**  
27 **98 for this filing.**

28 A. The net change in Schedule 98 is a rate decrease of \$1.4 million, or 0.1 percent. This  
29 net change is the difference between the current refund level of \$10.4 million and the  
30 new proposed refund level of \$11.8 million for the 2026 RBA.  
31 Exhibit RMP\_\_(KLE- 1), page 1, shows the net impact by rate schedule.

### 32 **III. PROPOSED RBA RATE SPREAD**

33 **Q. What is the total deferred RBA balance in this case and the requested annual**  
34 **recovery amount in Schedule 98?**

35 A. The total deferred REC revenue balance is a surcredit to customers of \$11.8 million, as  
36 shown in Mr. Nicholas L. Highsmith’s Exhibit RMP\_\_(NLH-1). The Company  
37 proposes to recover the total deferral balance over one year, beginning June 1, 2026.

38 **Q. How does the Company propose to allocate the 2026 RBA deferral revenue across**  
39 **customer classes?**

40 A. Consistent with the 2025 RBA, the Company proposes to allocate the 2026 RBA  
41 deferral revenue across customer classes based on the cost of service factor 10 used in  
42 the 2024 general rate case, Docket No. 24-035-04 (“2024 GRC”). The Company  
43 proposes using this allocation, because RECs are produced from renewable resources,  
44 and renewable resources are allocated to customer classes on cost of service factor 10.

45 **Q. Did the Company make any other modifications to rate spread?**

46 A. Yes, the Company made two modifications which are consistent with modifications  
47 made in past RBA filings.

48 First, consistent with the terms of the contract approved by the Public Service  
49 Commission of Utah in Docket No. 21-035-69, the 2026 RBA revenue allocation for  
50 Contract Customer 1 is based on the overall 2026 RBA percentage to tariff customers  
51 in Utah. Second, consistent with the terms of the contract approved by the Public  
52 Service Commission of Utah in Docket No. 23-035-51, Contract Customer 3 is not  
53 subject to the RBA in 2026 and therefore no share of the costs will be allocated to it.  
54 After these two modifications, the rest of the deferred REC revenues are allocated to  
55 the other customer classes on cost of service factor 10. Exhibit RMP\_\_\_ (KLE-1),  
56 page 2, contains the Company's proposed rate spread. Based on the forecast test period  
57 12-months ending December 2025 from the 2024 GRC, this proposal would result in  
58 an overall decrease of 0.1 percent from current rates.

#### 59 **IV. PROPOSED RATES FOR SCHEDULE 98**

60 **Q. How were the proposed Schedule 98 rates developed for each rate schedule?**

61 A. Consistent with the previous RBA filings, the proposed rate for each schedule was  
62 developed as a percentage surcharge to apply to customers' Monthly Power Charges  
63 and Energy Charges. The percentage for each rate schedule is calculated by dividing the  
64 allocated deferred REC revenue amount by the corresponding present revenues  
65 approved in the 2024 GRC, Docket No. 25-035-T10. Exhibit RMP\_\_\_ (KLE-2) contains  
66 the billing determinants and the calculations of the proposed RBA rates in this case.

67 **Q. Please describe Exhibit RMP\_\_\_(KLE-3).**

68 A. Exhibit RMP\_\_\_(KLE-3) contains the proposed Schedule 98 reflecting the new rates.

69 The Company requests that the proposed Schedule 98 rates become effective on

70 June 1, 2026.

71 **Q. Did you include workpapers with this filing?**

72 A. Yes. Workpapers have been included with this filing that detail the calculations shown

73 in my exhibits.

74 **Q. Does this conclude your direct testimony?**

75 A. Yes, it does.
