Re: Docket No. 26-035-32 – *Rocky Mountain Power's Utah Final Carbon Reduction Progress Report*

Dear Mr. Backlund:

The Public Service Commission (PSC) has reviewed the Utah Final Carbon Reduction Progress Report (the "Report") from Rocky Mountain Power (RMP) as filed on July 1, 2026. The Report was filed in compliance with Utah Code Ann. (UCA) § 54-17-604. A Notice of Filing was issued on July 7, 2026. The PSC also reviewed the Division of Public Utilities' (DPU) Action Request response filed on July 16, 2026.

The Report states that RMP has met the 20% Renewable Portfolio Goal (RPG) target of 4,866,093 MWh of cost-effective renewable energy by 2025 from existing company-owned and contracted renewable energy resources, backed by existing bundled RECs. Overall, RMP has a total of 15,389,561 MWh of eligible qualifying electricity. All the owned and contracted resources that make up the qualifying renewable electricity were acquired through IRP resource modeling, procurement, and PSC approval. RMP has no recommended legislative actions or program changes at this time.

DPU has reviewed the Report and recommends the PSC acknowledge the Report as complying with the Utah Energy Resource Procurement Act (the "Act"), Section 604. DPU further acknowledges that RMP has satisfied the 2025 RPG and recommends the PSC acknowledge that no further reporting by RMP is required under the RPG provisions of the Act.

Docket No. 26-035-32
Acknowledgment Letter from the PSC
September 9, 2026
Page 2

Based on the PSC's review of the Report and DPU's comments, the PSC acknowledges RMP's Report complies with the requirements of UCA § 54-17-604. Additionally, the PSC acknowledges that RMP has met the RPG and no further reporting by RMP is required by the Act.

Sincerely,

/s/ Gary L. Widerburg
PSC Secretary
