To Whom it May Concern,

Dixie Power has drafted the attached 2026-2029 version of the Wildland Fire Prevention Plan to comply with the requirements specified in Utah Code 54-24-203. This Plan has been reviewed by pertinent agencies, received input from interested parties, undergone review by a third-party expert, and been adopted by the Dixie Power Board of Directors; all of these actions are documented in the body of the plan.

Dixie Power now wishes to file this plan with the Utah Public Service Commission and the Division of Public Utilities.

Please let us know if you have any questions or concerns.

Sincerely,

Russell Condie
Engineering Manager
Dixie Power
