Will-Power UT, LLC's Intent to Supplement as Aquila Power Station Materials Become Available.

The Aquila Power Station, the closed private generation facility which will provide the electrical services contemplated in the Power Purchase Agreement (“PPA”) is not yet in operation. As such, some of the materials required by the statute and regulations are not yet available to Will-Power UT, LLC (“Will-Power”), during the pre-operation stages of this project.

In amending its application for approval of a closed private generation contract as reflected in Docket No: 26-2660-01, Will-Power has provided the Utah Public Service Commission (“PSC”) with everything currently available to Will-Power at this stage of the project. Furthermore, Will-Power wishes to make clear to the PSC its intent to provide updated information in satisfaction of the statute, regulations, and the PSC’s requested additional information at the earliest possible time that this additional information becomes available to Will-Power.
