Mr. Bryan T. Stewart, Chairman
Utah Public Service Commission

Dear Commissioner:

During the past few months, I have followed closely the news reports and share holders information concerning the proposed merger of Utah Power and Light with PacifiCorp. I have been convinced that the citizens of Utah would best be served if this merger is approved. My reasons are that I believe economies effected would result in lower - or at least fewer increases - rates and a much more dependable supply of power. I believe that Utah would retain the present jobs of Utah Power and light. All in all, the proposition sounds good to me and I lend my support.

Many thanks and best regards.

Yours truly,
