

Qualifications of Gary L. Robinson

Professional Associations

I am a Certified Public Accountant (CPA) in the State of Utah and belong to the American Institute of Certified Public Accountants (AICPA) and the Utah Association of Certified Public Accountants (UACPA).

Educational Background

I received a Bachelor of Arts degree in finance from the University of Utah in 1976, a Bachelors of Science in Accounting from the University of Utah in 1984, and a Master of Business Administration from the George Washington University in 1977. I have participated in numerous seminars and conferences on rate and regulatory matters sponsored by the American Gas Association (AGA), the Institute of Gas Technology (IGT), the Pacific Coast Gas Association (PCGA), and others. I also regularly participate in various continuing education programs to maintain membership in the AICPA and the UACPA.

Appearances In Regulatory Proceedings

I have previously presented testimony before the Utah Public Service Commission, the Wyoming Public Service Commission and the Federal Energy Regulatory Commission.

Current Responsibilities

As Director of State Regulatory Affairs, I am responsible for the preparation of rate cases and the preparation and coordination of tariff filings. I also have responsibility for monitoring the rate of return earned by Questar Gas in the Wyoming and Utah jurisdictions. Other responsibilities include coordination of responses to data requests and tariff maintenance.

Prior Experience

I was hired by Mountain Fuel Supply in October 1979 as a Rate Analyst. I have worked on numerous rate filings primarily in the areas of cost of service studies, rate design, O&M expense forecasting, and rate base calculation. In 1984 I was promoted to Director of forecasting where I had supervisory responsibilities for the preparation of sales and customer forecasts which were used in budgets, tactical plans, and rate case filings for Questar Gas. I have helped develop the temperature adjusting and forecasting methodologies and the revenue requirement, cost of service and rate design models which are currently used in the department and in this rate case. In November 2007, I assumed my current position.
