Dear Mr. Boyer

Subject: CNG infrastructure

I would like to urge that the price of CNG at gas pumps be increased to cover the costs of maintaining and improving the infrastructure. However, I would also like to urge that Clean Energy and unregulated monopolies not be allowed to purchase the infrastructure from Questar. If California's experience is any indication, the price charged by Clean Energy and unregulated monopolies will be so high that the CNG users will discontinue use of their vehicles.

Thank you for your attention to this issue.

Sincerely,

Ran Macdonald
