Subject: How dare you let questar raise prices

Are they not profiting already? I realize you people probably get a gas allowance and all other kind of govt perks while the rest of us drown in high prices, this govt is corrupt and disgusting. Its funny how we are supposed to be a democracy but I don't recall being asked my opinion on this issue. If I a private citizen was sued and owed someone alot of money for either blowing up their house and family or was being fined by the EPA would I be allowed to charge people randomly to ensure I could pay those debts? No we the people would have to foreclose on our house, loose our car, get rid of cable , but the monopolies of this state get to keep chugging along with no punishment to them because they get to pass it on to us peons.

Feel ashamed.
Sincerely
Sherri Gagnon
