Dear Governor Huntsman,

RECEIVED

I am very concerned with the Public Service Commission's recent decision to increase the price of CNG (Late December). I was not aware of any hearing or decision being made on this issue and none of the other CNG vehicle owners I have spoken with were aware of anything until after the decision was made.

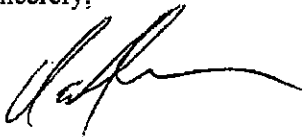

I purchased 3 Natural Gas Vehicles for a couple of reasons among which, first was the high price of other fuels, second was the environmental benefits of driving CNG vehicles also the longevity of engines running on clean natural gas and the fact that natural gas is so plentifully available as a natural resource right here in Utah.

Supply and demand is what has increased the sale of CNG and Natural Gas Vehicles in Utah over the past couple of years. One of my concerns is with the increase of fuel prices to nearly the same price as regular fuel right now there will be a decrease in demand for CNG and Natural Gas Vehicles.

★ Please put a moratorium on the decision that has been recently passed and provide for a commission to further investigate the voice of the people on this matter.

Thank you for your help and attention in this matter.

Sincerely,

Dan Flynn
