UTAH PUBLIC
SERVICE COMMISSION

2009 JAN -5 A 7:28

RECEIVED

To Whom it may concern,

It is very disappointing to see the momentum on NGV conversions and public awareness on the benefits of NGV be slammed in the face with the massive price increase. Utah is geographically situated to be one of the nation's biggest beneficiaries of natural gas – it is also plagued with air quality issues. How unfortunate that the source of our cleaner air and dependence on foreign oil is at our doorsteps but we cannot tap into it because of this extreme price increase. You are looking at the wrong green solution here.

Please re-open Docket 07-057-13 for public comment, and remove the NGV rate decision until the broader policy issues of Docket 08-057-21 are decided on. The "Wexpro" gas should continue to be included in NGV rate calculations.
