CNG proposal (Docket 07-053-13)

I strongly oppose this proposal under the grounds that most all CNG users in Utah are Questar Gas customers. At the very least, a gas card could be provided to Questar customers that have taken the time and expense to think ahead of the public and make the expense to purchase a CNG vehicle. I have already noticed air quality improvement to the Salt Lake Valley.

CNG users are heroes to the environment and our dependence of foreign oil. Shame on those who want to discredit their foresight!

Nelson Moyle, Questar customer.
