Subject: Questar natural gas for automobiles

I am writing to request you to re-open Docket 07-057-13 for public comment. I am a CNG owner of two vehicles and have spent over \$35,000 to purchase vehicles that are cost efficient and environmentally friendly. Before purchasing my vehicles I was assured by Questar people that the price would remain low and more infrastructure would be built. With the big problem of clean air along the wasatch front I would think the public service commission would want to encourage CNG use. I think "Wexpro" gas resource should continue to be included in NGV rate calculations. We need to go forward with natural gas use and not discourage it with this new rate hike.

Thank you for your consideration,

Joel Quinn
