RECEIVED

I cannot think of a worse thing to do in this economy than raise prices of natural gas. Oh, maybe I can !!! Aren't we supposed to be reducing our dependence on foreign oil?? Isn't Natural gas supposed to be one of the better alternatives?? Certainly that was the case until the public "SERVICE" commission made the worst decision possible, raise the price of natural gas for cars. My wife and I were considering either converting our truck or buying a natural gas automobile but now you have made that decision mute. Please do the public the favor of reconsidering your ill-advised decision or we will have to dub you the public DISSERVICE commission. Rest assured we, the public, will be watching.

Respectfully submitted,
Mark and Karen Rabwin
