Classification: UNCLASSIFIED  
Caveats: NONE

Mr. Boyer,

This email is to urge you to reconsider the recent PSC decision to exclude the Wexpro gas from the pricing for CNG vehicles.

This is a selfish, radical decision that will undermine what progress Utah has made in the NGV industry. Our state continues to be one of the cheapest in the nation and more and more UTAHNS are driving CNG; not only helping our environment but generating revenue for Utah business and reducing our dependancy on gasoline/diesel.

Do what is right, put this decision to the public and let the people using the natural gas in this state make the decision.

SFC Doug Spencer
