

To Whom It May Concern:

I bought a CNG only truck this last spring to do my part to lower pollution here in Utah. I live in Eagle Mountain, and have to go out of my way to buy gas for the truck. I want you to do whatever you can to stop the proposed increase in price for CNG in Utah. If there is no longer an incentive for alternative fueled vehicles, their market and worth will DISSAPEAR overnight. This price hike would take us multiple steps backward in promoting cleaner transportation here in Utah.
