Subject: CNG Fuel Rates

I strongly disagree with the ruling that CNG customers are not Questar gas customers. In Utah there is no other source of natural gas. Everyone using CNG is a Questar customer by definition. The purpose of regulating gas service is to protect against the effect of the obvious monopoly. The new policy is certainly not controlled by a competitive market place. We will be paying prices based on areas where gas is not cheap and plentiful as it is in Utah. I am certain one could make a case regarding the violation of anti-trust laws. I urge you to reverse the decision and do the right thing to protect the consumer from price gouging of a monopoly.
