COMPLAINT TYPE: High Bill

COMPLAINT: On Wed. Jan. 7, 2009 I was informed that my Natural Gas Vehicle fuel was going to more than double. The entire reason why I bought a natural gas vehicle was to influence others to buy natural gas vehicles to reduce carbon dioxide emissions and reduce the dependence on foreign oil in Salt Lake and Utah counties. I teach physical science in Salt Lake, I have helped build playgrounds in our communities, and build greenhouses at schools. I have worked very hard at making our community better. And in one day, the entire motivation for any person living in Utah to buy a natural gas vehicle is gone. Please reverse your decision to raise the price of natural gas for vehicles for the environment and our economy.

SUGGESTED RESOLUTION: Keep the price of compressed natural gas low so people living in Utah will buy natural gas vehicles therefore reducing carbon emissions, our dependence on foreign oil, and buy a western US product.
