

Mr. Ted Boyer,  
Mr. Ric Campbell,  
Mr. Ron Allen,

I am Kit Wilkinson, a middle school science teacher and a NGV owner. I am asking you to not raise the price of the fuel for an NGV. Let me give you two reasons why. 1st, the air quality is getting worse in Salt Lake, Utah, and Davis counties. NGVs are cleaner than gasoline vehicles, thus not making the air quality as bad in our great state of Utah. The second reason, and to me is an acute problem, is to reduce or eliminate the U.S. dependence on foreign oil.

If the price of CNG is raised, the motivation to buy an NGV is gone. Why would a person, other than a science teacher, inconvenience themselves just to save the climate?

I know revenue is your motivation to raise the price of CNG. I am asking you three men, to look at the big picture. I will contact legislators, to try to set things right. Thank you so much for your time.

Sincerely,

Kit C. Wilkinson
