Hi my name is Jordan Robison I recently have hired 3 people to help me with a new company called Huckleberry Homes. We currently charge 35 cents. We are able to help literally hundreds of people in the Uintah Basin who unfortunately have under insulated houses. Through this rebate program we have been able to help these people cut down on huge costs. If these rebates are lowered to 20 cents. We will be forced to stop what we are doing. So many people right now are hurting and have no extra money to pay the difference or would pay if they had even a little. I do not know what weighs on your decision to change this rebate but I hope you will not put a stop to our employees and the hundreds of people we would continue to help take advantage of this program at no cost to them. Thank You,
Jordan Robison
