**From:** Utah Division of Public Utilities

Chris Parker, Director

Artie Powell, Manager

Carolyn Roll, Utility Technical Consultant

Lane Mecham, Utility Analyst

**Date:** September 12, 2018

**Re: Dominion Energy Utah - 191, Pass-Through Docket Nos. 12-057-08 and  
13-057-03**

## Comments

On September 5, 2018, the Utah Public Service Commission (“Commission”) issued a Supplemental Action Request asking for further clarification on the application of demand percentages to the 191 account. Specifically, it asked if the rates were just and reasonable using either of the cost allocation methods proposed by the Division of Public Utilities and Dominion Energy Utah. The Division’s answer is yes. Rates are just and reasonable using either of the allocation methods proposed. However, the Division is unclear as to whether or not the method proposed by Dominion Energy Utah complies with the Commission’s orders in these Dockets because the allocation is applied one month after the effective dates in the orders. The Division requests clarification on whether the method proposed by Dominion complies with the Commission’s orders.

**Cc:** Kelly Mendenhall, Dominion Energy Utah

Michele Beck, Office of Consumer Services
