

P.S.C.U. Docket No. 13-057-05

Data Request No. 2.06

Requested by Division of Public Utilities

Date of QGC Response August 12, 2013

DPU 2.06 Please provide an estimated completion date and total cost estimate for the high pressure feeder line replacement program.

Answer: Based on capital expenditures of \$55 million per year the anticipated completion/replacement date of currently identified aging infrastructure is 2028. However, Questar Gas continually evaluates its system and other portions of its system may be added to the list for replacement as additional information and analyses becomes available.

Prepared by: Brad Hasty, General Manager Engineering and Project Management,
Questar Gas Company
