APPLICATION OF QUESTAR GAS	)	Docket No. 13-057-09
COMPANY TO AMORTIZE THE	)	
ENERGY EFFICIENCY DEFERRED	)	
ACCOUNT BALANCE	)	APPLICATION

---

Questar Gas Company (Questar Gas or the Company) respectfully submits this Application to the Utah Public Service Commission (Commission) for approval of an increase in the amortization of the Energy Efficiency (Energy Efficiency) deferred account balance and an adjustment to the distribution non-gas (DNG) cost portions of its Utah GS natural gas rates pursuant to §2.09 of the Company's Utah Natural Gas Tariff No. 400 (Tariff). If the Commission grants this Application, typical residential customers using 80 decatherms per year will see an increase in their yearly bills of \$10.94 or 1.53%. The Company proposes to implement this request by charging the new rates effective October 1, 2013.

In support of this application, Questar Gas states:

1. Questar Gas' Operations. Questar Gas, a Utah corporation, is a public utility engaged in the distribution of natural gas primarily to customers in the states of Utah and Wyoming. Its Utah public utility activities are regulated by the Commission, and the Company's rates, charges, and general conditions for natural gas service in Utah are set forth in the Tariff. Copies of the Company's Articles of Incorporation are on file with the Commission. In addition, the Company serves customers in the Preston, Idaho area. Under the terms of agreement between the Commission and the Idaho Public Utilities Commission, the rates for these Idaho customers are determined by the Utah Commission. Volumes for these customers have been included in the Utah volumes.

2. Energy Efficiency Order. In the order dated October 5, 2006, approving the Settlement Stipulation in Docket No. 05-057-T01 (Order), the Commission authorized Questar Gas to establish a deferred expense account, Account 182.4 of the Uniform System of Accounts, in which to record the costs associated with the approved Energy Efficiency programs and market transformation initiative (Order at 15). This filing is made under §2.09 of the Tariff, which sets forth procedures for recovering the deferred Energy Efficiency related expenses by means of periodic adjustments to rates and amortizations of this account.

3. Test Year. The test year for this application is the 12 months ending September 30, 2014.

4. Amortization and Analysis of Account No. 182.4 Balance. Attached as Exhibit 1.1 is a summary of the Energy Efficiency deferred expenses accounting entries for the period from September 2012 through July 2013. In the order dated January 16, 2007, in Docket 05-057-T01 approving the Energy Efficiency programs, the Commission required that “Questar shall keep detailed records of all DSM expenditures and shall track them by each separate DSM program or marketing initiative, and by expenditure type. Summary statements prepared from these records shall be presented to the Commission as part of the Account 182.4 approval process” (Order at 9). Attached as Exhibit 1.2 is a summary of the deferred Energy Efficiency related expenditures by Energy Efficiency program (page 1) and by Energy Efficiency program and expenditure type (page 2) since September of 2012. The Energy Efficiency balance, as of the end of July 2013, is \$13,883,365 (Exhibit 1.1, column F, line 11). In its Order, dated May 31, 2011, the Commission approved the rates proposed by the Company in Docket 11-057-04, which included a proposal to reduce the Energy Efficiency balance to zero over the course of three years. Dockets 11-057-15, 12-057-10 continued the implementation of the three year accelerated amortization. This year the weatherization program has seen higher

participation levels than were anticipated and, as a result, the Company has spent more than its \$24 million budget. As a result, the Company is proposing to move the Energy Efficiency amortization level from \$24,400,000 to \$37,720,500, which will allow the Energy Efficiency balance to be at or near zero within the previously approved three year time period. If this Application is granted it is estimated the amortization will draw the account balance down to zero by the Spring of 2014. Using \$37,720,500 increases the amortization rate from \$0.24982 to \$0.38690, or an increase of \$0.13708 per Dth on the GS DNG rates as shown in Exhibit 1.3, column D.

5. Proposed Tariff Sheets. Exhibit 1.4 shows the proposed GS rate schedule that reflects the amortization of the balance in Account 182.4 as explained in paragraph 4.

6. Change in Typical Customer's Bill. The annualized change in rates calculated in this application is a 1.53% increase or \$10.94 per year for a typical GS residential customer using 80 decatherms per year. The projected month-by-month changes in bills are shown in Exhibit 1.5.

7. Exhibits. Questar Gas submits the following Exhibits in support of its request to amortize the DSM/EE balance:

Exhibit 1.1	Energy Efficiency Deferred Expense Account Entries in Account 182.4
Exhibit 1.2	Energy Efficiency Program Expenditure Report by Energy Efficiency Program and Expenditure Type
Exhibit 1.3	Calculation of Proposed Rates
Exhibit 1.4	Proposed Tariff Sheet
Exhibit 1.5	Effect on GS Typical Customer

WHEREFORE, Questar Gas respectfully requests that the Commission, in accordance with the Order approving the Energy Efficiency Stipulation and the Company's Tariff:

1. Enter an order authorizing Questar Gas to implement rates and charges applicable to its Utah natural gas service that reflect an amortization in GS DNG rates, as more fully set out in this Application; and
2. Authorize Questar Gas to implement its rates effective October 1, 2013.

DATED this 3rd day of September 2013.

Respectfully submitted,

QUESTAR GAS COMPANY
