

TABLE OF CONTENTS

	<u>Page</u>
1. EXECUTIVE SUMMARY	1-1
2. INTRODUCTION AND BACKGROUND	2-1
Wexpro II Agreement and the Trail Unit Acquisition	2-7
Wyoming IRP Process	2-8
Utah IRP Process	2-9
Exhibit.....	2-14
3. CUSTOMER AND GAS DEMAND FORECAST	3-1
System Total Temperature Adjusted Dth Sales and Throughput	3-1
Temperature Adjusted Dth Sales and Throughput Summary - 2014 IRP	3-1
Residential Usage and Customer Additions	3-2
Small Commercial Usage and Customer Additions	3-3
Large Commercial, Industrial and Electric Generation Gas Demand	3-3
Firm Customer Design-Day Gas Demand	3-4
Periods of Interruption	3-4
Source Data.....	3-4
Utah and Wyoming Economic Outlook.....	3-5
The U.S. Economic Outlook.....	3-6
Alternatives to Natural Gas.....	3-7
Gas Lost and Unaccounted For Gas.....	3-10
Exhibits	3-12 - 3-22
4. SYSTEM CAPABILITIES AND CONSTRAINTS	4-1
Questar Gas System Overview	4-1
Ongoing and Future System Analysis Projects.....	4-2
System Modeling and Reinforcement.....	4-3
Model Verification.....	4-3
Gate Station Flows vs. Capacity	4-4
System Pressures.....	4-4
System Capacity Conclusions.....	4-10
DNG Action Plan.....	4-11
Integrity Management Plan Activities and Associated Costs.....	4-14
Transmission Integrity Management	4-16
Distribution Integrity Management.....	4-19
Environmental Review.....	4-27
5. PURCHASED GAS.....	5-1
Local Market Environment.....	5-1
Sendout Modeling Issues	5-2
Price Stabilization	5-4
Exhibit.....	5-5

6.	COST-OF-SERVICE GAS.....	6-1
	Cost of Service (COS) Modeling Factors.....	6-1
	Producer Imbalances.....	6-3
	Future Resources.....	6-5
	Production Shut-Ins.....	6-6
	Exhibit.....	6-7
7.	GATHERING, TRANSPORTATION AND STORAGE.....	7-1
	Gathering and Processing Issues.....	7-1
	Transportation Issues.....	7-2
	Storage Issues.....	7-6
	Other Issues.....	7-13
	Exhibits.....	7-15 to 7-21
8.	ENERGY-EFFICIENCY PROGRAMS.....	8-1
	Utah Energy-Efficiency Results 2013.....	8-1
	EE Effects on Peak Day.....	8-4
	Wyoming Energy-Efficiency Results 2013.....	8-4
	Utah Energy-Efficiency Plan 2014.....	8-5
	Wyoming Energy-Efficiency Plan 2014.....	8-9
	SENDOUT Model Results for 2014.....	8-9
	Avoided Costs Resulting from Energy Efficiency.....	8-10
	Exhibit.....	8-11
9.	FINAL MODELING RESULTS.....	9-1
	Linear Programming Optimization Model.....	9-1
	Constraints and Linear Programming.....	9-1
	Monte Carlo Method.....	9-2
	Natural Gas Price.....	9-3
	Weather and Demand.....	9-3
	Peak Day and Base Load Purchase Contracts.....	9-4
	Normal Temperature Case.....	9-5
	Purchased-Gas Resources.....	9-5
	Cost-of-Service Gas.....	9-5
	First-Year and Total System Costs.....	9-6
	Gas Supply/Demand Balance.....	9-6
	Exhibits.....	9-7 to 9-96
10.	GENERAL IRP GUIDELINES/GOALS FOR GAS SUPPLY AND ENERGY EFFICIENCY RESOURCES.....	10-1
11.	APPENDIX A.....	11-1
