Dominion Energy Utah Docket No. 16-057-01 2nd Qtr. 2017 Integration Progress Report DEU Exhibit 14 Page 1 of 6

August 15, 2017

Attached please find Dominion Energy Utah/Wyomings' Customer Satisfaction Standards Report (CSSR) for the 2nd quarter ended June 2017.

In Docket No. 16-057-01, the Matter of Joint Notice and Application of Questar Gas Company and Dominion Resources, Inc., the parties agreed in paragraph 47 of the settlement stipulation that "Within 120 days of the Effective Time, Dominion Questar Gas will meet with the Division and the OCS on a collaborative basis and update Customer Satisfaction Standards, taking into account recent historical results. Dominion Questar Gas will report quarterly on its performance relative to the Customer Satisfaction Standards. Quarterly reporting will continue until Dominion Questar Gas' next general rate case filing. If the Dominion Questar Gas service levels become deficient, meaning they fall short of the Customer Satisfaction Standards as shown in the report, Dominion Questar Gas will file a remediation plan with the Commission explaining how it will improve and restore service to meet the Customer Satisfaction Standards."

The parties met with the Division and Office of Consumer Services in the 4th quarter of 2016 and updated 14 of the standards. This report includes these updated standards. The attached report is for the four quarters ending June 2017 and provides the customer satisfaction results using the goals that were in effect at the beginning of the year.

Dominion Energy met with the Division and the OCS and have updated the customer satisfaction standards. The first and second quarter results are attached as Exhibit 14. There are three areas where the Company is deficient. Customer Care metric #3, average wait time after menu selection was 51 seconds on average instead of 45 seconds on average. Billing metric #1, read each meter monthly, was 97.4%, instead of 99% on average. These two metrics were deficient due to issues with battery failure on transponders. When the batteries fail, meter reads decrease and meter read estimates increase. This results in higher call volume and a lower number of reads. The Company is currently undergoing a transponder replacement program that is scheduled to be complete in 2019. This should result in reduced battery failures, higher meter reads and lower call volume. The third deficient metric was billing metric #5, "Response time to investigate meter problems and notify customer within 15 business days". This metric was 94% instead of 95% because the responsible department was down by three employees due to job changes and maternity leave. Going forward this department is fully staffed and response times should improve.

Cc: Doug Wheelwright, DPU Maria Martinez, DPU Cheryl Murray, OCS
