Subject: Docket No. 15-057-16

Dear Commissioners:

In docket 05-057-T01 Questar Gas Company (Company) was directed by the Public Service Commission (Commission) to “regularly apprise” the Division of Public Utilities (Division) on the energy efficiency program spending, participation, and decatherm savings. In response to this order, the Company created the Energy Efficiency Report or DPU Report and provides the report quarterly to the Division. The Company has historically also provided this report to the Commission in an effort to keep all stakeholders apprised of program performance.

On March 27, 2017, the Company delivered a courtesy copy of its 2016 Energy Efficiency Report to the Commission. On March 28, 2017, Commission staff notified the Company of their opinion that the report was “proprietary” and therefore, should be emailed through the designated SFTP server. The Company was also notified that prior quarterly reports had been marked as “proprietary” and removed from the public website.

The Company does not consider nor has it labeled this report proprietary or “Confidential.” However, in prior versions of this report, the summary page has included a “Program Total” line that has been highlighted in yellow. The purpose of this yellow highlight was to call attention to the total program spending, participation, and decatherm savings and was not intended to denote confidentiality. To prevent any further confusion, the Company will change the highlighted row to a different color.

If you have any questions, or if we can provide additional information, please contact me.

Sincerely,

Michael A. Orton
Director Energy Efficiency
