Outlook: Stable

S&P Global Ratings' stable outlook on Salt Lake City-based Questar Gas Co. (QGC), reflects the outlook on ultimate parent Dominion Energy, Inc. (Dominion) and the expectation that Dominion will continue consisting of mostly lower-risk regulated utilities. Additionally, we expect Dominion's consolidated financial measures will improve gradually, consistent with the middle of the range for the significant financial risk profile category, reflecting consolidated funds from operations (FFO) to debt of about 17%.

Downside scenario

We could lower the rating on QGC over the next 12-24 months if its ultimate parent, Dominion's business risk profile weakens either by less-effective management of regulatory risk or through disproportionate growth of its higher-risk businesses. We could also lower the rating if Dominion's consolidated financial measures consistently reflected the lower end of the range for the significant financial risk profile category, reflecting consolidated FFO to debt consistently below 15%.

Upside scenario

We could raise the ratings on QGC over the next 12-24 months if its ultimate parent, Dominion's consolidated financial measures consistently improved to the higher end of the range for the significant financial risk profile category, reflecting FFO to debt consistently greater than 20%.

Our Base-Case Scenario

Questar Gas Co.

Assumptions

- Incrementally improving economic conditions in the company's service territory, resulting in higher cash flows;
- Future rate case increases;
- Continued use of riders;
- Capital expenditures averaging about $220 million annually;
- Dividends at about $40 million; and
- Negative discretionary cash flow.

Business Risk: Excellent

QGC serves approximately one million customers in Utah (about 97%), southwestern Wyoming, and southeastern Idaho. Constructive regulation in Utah strengthens the company’s management of regulatory risk including a credit supportive rate design and the use of multiple regulatory mechanisms including a fuel cost adjustment, a weather normalization adjustment, decoupling, and an infrastructure cost tracking adjustment. QGC cash flows are generally stable and largely insulated from fluctuations in gas prices, weather, and usage. Furthermore, most of the customer base is residential and commercial, providing an additional measure of cash flow stability. Marginally effecting the company's business risk profile is the general lack of business or regulatory diversity.

QGC has good access to gas supply (65% of the utility's supply) due to its relationship with Wexpro, a cost-of-service exploration and production operation company providing natural gas to QGC at cost plus a fixed return. In addition, Dominion Energy Questar Pipeline, LLC, another affiliate, provides QGC with long-term transportation contracts and storage. These relationships and contracts minimize QGC's supply risk compared to peers.

**Financial Risk: Significant**

We assess the company's financial measures using more moderate financial benchmarks compared to the typical corporate issuer, reflecting its low-risk regulated utility business and its effective management of regulatory risk.

Under our base-case scenario, which includes improving economic conditions in the company's service territory, a rate case increase in 2020, capital spending of about $220 million, and dividends of about $40 million, we expect financial measures consistent with the higher end of the range for the company's financial risk category. Specifically, we expect FFO to debt of about 20%.

**Liquidity: Adequate**

QGC has adequate liquidity, in our view, and can more than cover its needs for the next 12 months even if EBITDA declines by 10%. We expect the company's liquidity sources will exceed uses by more than 1.1x over the next 12 months, which is the minimum threshold for an adequate liquidity assessment under our criteria. Under our stress scenario, we do not expect the company would require access to the capital markets during that period to meet liquidity needs. Our assessment also reflects the company's stable cash flow generation, generally prudent risk management, sound relationships with banks, and a generally satisfactory standing in the credit markets.

Other Credit Considerations

We assess the comparable rating analysis modifier for QGC as positive, reflecting our view that QGC's financial measures will consistently reflect the higher end of the range for its financial risk profile.

Group Influence

Although QGC accounts for a relatively small portion of Dominion's overall business, representing less than 5% of Dominion's operating income, we assess QGC as a core subsidiary of Dominion, under our group rating methodology. This reflects our view that QGC is highly unlikely to be sold, has a strong long-term commitment from senior management, is successful at what it does, and contributes meaningfully to the group. As a result, we assess QGC's issuer credit rating as in line with Dominion's 'bbb+' group credit profile.

Ratings Score Snapshot

Corporate Credit Rating
BBB+/Stable/A-2
