

Distribution Plant Factor Study [Summers DIRECT TESTIMONY at lines 87-126]

Technical Questions: Please refer to DEU Exhibit 4.03 p1, image below:

1. In what ways do GS customer usage and distribution plant characteristics as demonstrated in DEU Exhibit 4.03, p1, differ from those same elements among GS customers within multi-unit or high-density residential dwellings, particularly newer construction?
2. Does the Distribution Plant Factor Study identify the differences? If so, how?
