

P.S.C.U. Docket No. 19-057-13
Data Request No. 3.09
Requested by Division of Public Utilities
Date of DEU Response July 16, 2019

DPU 3.09: During the coldest months of December, January and February, what percentage of the Company's gas supply is provided through Questar Pipeline? What percentage is provided through Kern River?

Answer: The percentages of gas supply provided from Dominion Energy Questar Pipeline (DEQP) vs. Kern River (KRGT) during December, January, and February will vary each year depending on pricing at different locations, availability, storage usage, and cost-of-service production volumes. However, in general, the percentage split during these months is approximately 80% transported on DEQP and 20% on KRGT.
