

P.S.C.U. Docket No. 19-057-31  
DPU Data Request No. 2.06  
Requested by the Division of Public Utilities  
Date of DEU Response March 10, 2020

DPU 2.06: Regarding the confidential response from Kern River in DPU DR #1.13, please explain what is meant by the phrase “Unless EDUWI is able to negotiate other terms, KRGT’s minimum pressure to DEQP is typically +-650 psig Not a problem, this is typical at all of the KRGT to DEU gate stations.” Please explain why DEQP’s bid is referencing the KRGT pressure and its relevance to the DEQP bid. Also, please provide a complete copy of the Scope of work provided to each pipeline and their complete replies.

Answer: Some of the requested information is confidential and will be provided to those parties who agree in writing to comply with Utah Admin. Code R746-1-601 through 603.

The prior document was incorrect in referring to KRGT at this location. DEU will tap Dominion Energy Questar Pipeline (DEQP) at this location and receive gas from DEQP. DEU worked with DEQP to correct the error and the correct documentation is attached as DPU 2.06 Confidential Attachment 1. This document was provided by DEQP and includes the scope of work.
