

Docket 21-057-03

Requested information (pics of house)

1st pic-Front of house, Dominion wants to put the meter on the front of house just to the left of the windows and underneath the entry stairs which will be an open design with clear view of meter.

2nd pic-view of house pulling up driveway. This is where a service truck would park.

3rd pic - Dominion wants to put meter to the left of the windows

4th pic- I'm standing at the second support in the 3rd pic.

5th pic- The meter will sit on the corner. Only 10 feet of uncovered walkway to meter. All level grade with no obstacles. This pic also shows full sun. Meter faces south with full sun all day. As you can see location is accessible, flat and covered walkway access.

6th pic- This area will be landscaped and retained with clear access to meter.

Thanks for your consideration on this matter.
