

Welcome to the Utah Rural Expansion – Green River Virtual Meeting!

- We will start the presentation a couple of minutes after the hour to give attendees time to access the meeting.
- Your audio has been **muted**. We ask that you please keep it muted during the presentation.
- If you are using your computer for audio and are experiencing difficulties hearing clearly, try joining the audio using the Call-in option.
- Use the “chat” function to ask questions during the presentation. **Please include your name and organization, if applicable.** We will also answer questions during the Q&A session at the end of the meeting.
- If you are accessing via your phone only, we will specifically ask for comments from participants on the phone.
- This meeting will be recorded and posted on our website for those who were unable to attend.

Green River Project Overview

PURPOSE & DESCRIPTION

The state of Utah passed House Bill 422 in May 2018 that allows the Utah Public Service Commission (PSC) to authorize Dominion Energy Utah to seek approval to bring natural gas infrastructure to rural communities.

Dominion is considering extending service to the City of Green River. If natural gas is extended to these towns, approximately **450 homes and businesses could receive natural gas service**. Dominion anticipates that natural gas service would also help the area's expected and potential growth.

Expanding service to Green River would include the construction of 14 miles of high-pressure natural gas pipeline and about 450 service lines to homes, businesses, etc. Dominion has begun preliminary routing, estimating costs and studying environmental effects of the project.

Green River Project Overview

WHAT YOU NEED TO KNOW

Q: How much will new gas service from Dominion Energy cost me out of pocket?

A: Legislation was passed in 2019 that allows the infrastructure costs to be paid by all Dominion Energy Utah customers for approved projects. Your out-of-pocket costs would include the cost of preparing your home and appliances to use natural gas and paying your monthly natural gas bill after your service commences.

Q: Will I need to buy new appliances?

A: In many cases, appliances can be converted from propane to natural gas. The cost of converting an appliance is the responsibility of the customer. Conversion and proper adjustment of appliances should be performed by a qualified contractor. If a propane appliance cannot be converted, a new appliance will be required.

Natural Gas

Facts

- Comprised of more than one-fourth of all primary energy used in the U.S
- Costs less to use than other major home energy sources
- Households that use natural gas appliances for heating, cooking and clothes drying save an average of \$879 per year compared to homes using electric appliances.*
- Nearly 21,000 businesses sign up to use natural gas each year.*
- Emits 52 to 56 percent less GHG than coal for the same amount of electricity.
- Cleanest fossil fuel on the market today

* American Gas Association 2020 Playbook

Properties

- Non-toxic
- Lighter than air
- Colorless
- Naturally odorless
- Narrow combustion range

Benefits of Natural Gas

Safety Benefits

Monitored 24 hours a day, 7 days a week, using sophisticated computer and telecommunications equipment at Dominion Energy's gas control centers.

Environmental Benefits

Clean, reliable natural gas supports a cleaner energy future.

Community Benefits

Increase energy efficiency, overall comfort and lower heating costs for consumers.

Economic Benefits

Supports residential, commercial and industrial growth.

Natural Gas Safety

Environmental

Stewardship

At Dominion Energy, we have a deep appreciation for the environment around us, and we know others do as well. We're not only aware of our impact on the environment—we're working to reduce it. From lowering greenhouse-gas emissions to protecting water quality and preserving wildlife habitat, we're constantly looking for ways to ensure that the natural world is maintained for future generations.
