**PLEASE READ:**

- Once signed by Applicant and accepted by the Supervisor, this application now becomes the Permit and the Applicant is now the Permittee. The Permittee is guaranteeing the completion of any improvements or construction proposed therein, in conformance to the specifications set forth by the Supervisor and/or contained in this application. This application creates no agreement that upon failure to do so, the County or other competent contractor assigned to do so by the County, may complete the same to the satisfaction and charge the costs thereof to the Applicant/Permittee.
- A Class 3 Encroachment means encroaching, boring, jacking, cutting or placement or other disturbance by utilities within County road right-of-way for the purpose of installing, repairing or maintaining cables, pipelines or other utility structures buried within the road right-of-way.
- The Supervisor shall, within ten (10) working days, either grant the application or deny it. The Supervisor shall, when needed, confer with Planning and Zoning and other affected agencies during preliminary phases of the review of this application. If the Supervisor denies the application, he/she shall return it to the Applicant and set forth in writing the reasons for doing so. The Applicant may submit an amended application at any time thereafter.
- An annual Blanket Permit means an Encroachment Permit issued for a period of one year based upon a written plan to applicants who, of necessity, would otherwise need numerous Encroachment Permits. The Annual Blanket Permit is designed to alleviate the necessity of securing a performance and completion bond for each Encroachment permit.
- Permittee is required to supply maps, plans or engineering drawings displaying the current locations on permanent views of utility lines within the County right-of-way to be affected by the proposed encroachment and the proposed alignment of any new or replacement lines or pipelines for which the Permit is requested. Applicant is also required to supply a waiver of all liability for damage to the lines by the County or by others within whose existing lines are located within the vicinity of the proposed new or replacement line. If utility lines need to be moved to accommodate changes in road geometry/performance, Permittee will assume all costs.
- Each Applicant, as a condition of the release of the bond, is required to notify Blue Stacks according to proper procedure and provide acceptable GPS location or sensitive information to the Binary County GIS Department sufficient to maintain utility, roadway and drainage mapping current.

**PLEASE READ:**

1. Once signed by Applicant and accepted by the Supervisor, this application now becomes the Permit and the Applicant is now the Permittee. The Permittee is guaranteeing the completion of any improvements or construction proposed therein, in conformance to the specifications set forth by the Supervisor and/or contained in this application. This application creates an agreement that upon failure to do so, the County or other competent contractor assigned to do so by the County, may complete the same to its satisfaction and charge the costs thereof to the Applicant/Permittee.
2. A Class 3 Encroachment means excavating, boring, jacking, cutting of pavement or other disturbance by utilities within County road right-of-way for the purpose of installing, repairing or maintaining cables, pipelines or other utility structures buried within the road right-of-way.
3. The Supervisor shall, within ten (10) working days, either grant the application or deny it. The Supervisor shall, when needed, confer with Planning and Zoning and other affected agencies during preliminary phases of the review of this application. If he/she denies the application, he/she shall return it to the Applicant and set forth in writing his/her reasons for doing so. The Applicant may submit an amended application at any time thereafter.
4. An Annual Blanket Permit means an Encroachment Permit issued for a period of one year based upon a written plan to applicants who, of necessity, would otherwise need numerous Encroachment Permits. The Annual Blanket Permit is designed to alleviate the necessity of securing a performance and completion bond for each Encroachment permit.
5. Permittee is required to supply maps, plans or engineering drawings displaying the current locations on pertinent views of utility lines within the County right-of-way to be affected by the proposed encroachment and the proposed alignment of any new or replacement lines or pipelines for which the Permit is requested. Applicant is also required to supply a waiver of all liability for damage to its lines by the County or by other utilities whose existing lines are located within the vicinity of the proposed new or replacement line. If utility lines need to be moved to accommodate changes in road geometry/construction, Permittee will assume all costs.
6. Each Applicant, as a condition of the release of the bond, is required to notify Blue Stakes according to proper procedure and provide acceptable GPS location or centerline information to the Burety County GIS Department sufficient to maintain utility, roadway and drainage mapping current.
