RE: *Encroachment within PacifiCorp's Camp Williams – Four Corners 345kV, Helper – Moab 138kV Transmission Power Lines located near Thompson, UT.*

Dear Mr. Swan:

Thank you for contacting Rocky Mountain Power to discuss your proposed encroachment to our 345kV and 138kV transmission power lines. Our engineers have reviewed your request and approve the encroachments.

I want to take this opportunity to advise you of the federal safety measures in place to protect the public from high voltage power lines. The OSHA has express requirements and clearance distances with respect to working near power lines and enforces the High Voltage Overhead Power Lines Act.

Please let us know if we can be of further assistance to you. We appreciate your assistance and cooperation in helping us to maintain our high quality of service to our customers and to operate our facilities in a safe and efficient manner.

Sincerely,

Brian Bridge
